

To Whom It May Concern,

Fall 2022

takes second chances seriously. I am the Education Case Manager for Shasta Probation/STEP-UP (Shasta Technical Education Program Unified Partnership), and he has been on my education caseload for two years. has **earned** the opportunity to have his criminal record expunged.

In the Summer of 2022 was featured as a guest writer in our local online news source, a .com. In his published article, he did a masterful job of exploring our nation's fentanyl epidemic and the devastating impact on families and communities in our North State. cares deeply about the wellbeing of our community. His fertile ideas, intelligence, and passion for our county are traits that leaders possess.

Below is a sample of some of his most recent achievements:

- Natural Sciences AS Degree, Shasta College, May 2022
- Shasta College EOPS Student of the Year nominee
- California Humanities Emerging Journalist Fellowship Program
- Maintains a FT job

has demonstrated that rehabilitation does work. By supporting the expungement of his record, we are giving him access to spheres of society (housing, employment, credentials, national registries) that historically have not been available to people with criminal records. This will open doors for him, and he will take full advantage of these opportunities. I am excited to see him further his education and establish his career.

's family can now depend on him; an achievement he is especially proud of. Being present for and committed to his family is an integral part of his comeback story. He has rectified his past mistakes. He is leading an **upstanding** life and a wide range of professionals can attest to this. It has been rewarding working alongside him. Feel free to contact me at the number or email listed below.

Regards,
